

Full Texts of 2567 Statements of Deficiencies

These Excel files contain the full texts* of each nursing home deficiency that Survey Agencies cited on the CMS Form 2567 (Statements of Deficiencies). As of August 2012, these files contain deficiencies from the Standard Surveys (Inspections) conducted roughly in the last year and from Complaint Surveys as early as March 2011. CMS will eventually extend the reporting to contain three Standard Survey periods and three years of Complaint Surveys. Due to the size of these files, they are divided into CMS Regions. Please see [this document](#) for a list of CMS Regions and the States that they comprise.

The layout of the files is as follows:

Fields:

- state
- provnum (Centers for Medicare and Medicaid Services Certification Number)
- facility_name
- address
- city
- zip
- inspection_date
- deficiency_tag (Tag code of the regulation for which the facility failed compliance)
- scope_severity (System of rating the seriousness of deficiencies and breadth of residents affected)
- inspection_text

* Please note that although these are the full texts, diagnoses, medications, and similar items have been removed in order to protect resident identity and confidentiality.
